INTRODUCTION

HEALTH:

The health curriculum, or life skills curriculum as it is now called, is designed to foster self-responsibility and the skills to promote a long responsible life. The focus is on student decision-making by giving the information students need to understand various aspects of health and wellness, and to provide the instructional strategies to help students evaluate information so that they can make wise health and life style choices.

The 9th grade curriculum focuses on self esteem and the building of positive self-worth. Also included in the unit is decision making, values clarification and communication skills. Alcohol and drug awareness is discussed as well as the state mandated AIDS education.

The 10th grade curriculum consists of Driver Education theory, drug, alcohol and tobacco education.

The 11th grade curriculum includes mental and emotional health, drug, alcohol, tobacco education, nutrition, first aid, CPR, and AIDS education.

The 12th grade curriculum focuses on family life issues, relationships, parenting, the study of physical and social problems in our society and AIDS education.

Health instruction is augmented with guest speakers, film and videos, oral and written reports, weekly current events discussions, periodic quizzes and a final examination.

Students who are medically excused for the year must take health during the quarter in which their grade is scheduled.

PHYSICAL EDUCATION:

Physical education is designed to foster a greater understanding of the major role of exercise and fitness. Team sports and game activities will be included. In addition to the main fitness objectives, team.

Emphasis is on health and fitness practices that will affect the students' total well being and lead to a lifetime of good health and personal happiness. The focus will be on improving the personal fitness levels of all students in all grades. Written tests, skill tests, together with degree of participation, preparation for class, and attitude, will determine a student's mark.

The Physical Education program consists of an elective program grades 9-12. This allows the students the opportunity to choose from the course offered.

MEDICAL EXCUSES

A. From 3 days to 4 1/2 weeks the student must present a:

1. Doctor's note to nurse* (time frame for excuse).
 2. Nurse's notification to physical education teacher and the Health and Physical Education Director.
- B. More than 6 weeks (same procedure as "Less than Six Weeks" but with one exception):
1. A student may select an elective subject in place of the medically excused physical education program. This must be arranged through Guidance and the Health & Physical Education Director must be notified.
- *Doctors' notes must be presented prior to implementation of the medical excuse program.
